Unit Features

Cottage Unit:

The following formula will properly size a standard cottage style double hung:

Formula

1. Select the standard size double hung that will fit the rough opening
2. Subtract 7 1/2" (191) from the frame size height to get total glass height
3. Multiply the total glass height by the desired top sash ratio, this is the top sash glass height
4. Subtract the top sash height from the total glass height, this is the bottom sash glass height

Example

1. UDHRT G2 with a 0.400 top sash ratio (2/5 - 3/5) cottage style. If the rough opening is 2'-4 1/4" x 4' (RO for a CUDH-NG 2.0 2020) the frame size will be 25 1/4" x 47 1/2"
2. $47 \frac{1}{2}" - 7 \frac{1}{2}" = 40"$
3. $40"$ multiplied by 0.400 (2/5) = 16"
4. $40" - 16" = 24"$
5. The top sash will be a 2016 and the bottom sash will be a 2024. The call number for the example is: CUDH-NG RT 2.0 2016/24.
6. The top sash will be a 2016 and the bottom sash will be a 2024. The call number for the example is: CUDH-NG 2.0 2016/24.
